Customer Reviews

Paul Brodie's latest book *The Pursuit of Happiness*, is an excellent read written to bring out the happiness in your life, not just on the short term but to last the long term. Paul shares with his readers ten ways to do this. As he states in the book: "One of the biggest challenges in our lives is the ability to be happy. There is a lot of negativity that we must consistently battle throughout our lives." Every chapter is a valuable chunk of road that can get you to your destination. Here is a brief breakdown in what you'll find in the book: Chapter 1 encourages you to love what you do. Paul states here: "If we are doing what we love, then it will never feel like work." Finding the work we love is an essential part of happiness and that is why it's the first chapter. Chapter 2 is dedicated to one of the most important parts of pursuing your happiness. You first must recognize that happiness is a choice, and then decide whether or not to make that choice to be happy. Happiness is a choice that you must train your mind to make, and the author gives us clear examples of how we can do that. Chapter 3 covers gratitude. This is something we can all use and I would highly recommend reading this section twice. Chapter 4 is about money and happiness. Paul Brodie shares with readers personal stories from his past to express how he's experienced firsthand why happiness is much more important than money. A great chapter here and one of my favs! Chapter 5 is what life is all about focuses in on the absolute importance of family and friendship and how it contributes to daily happiness. Chapter 6 is about enjoying the things that matters most.
