One thing that our world does not encourage very well is stopping and listening -- stopping and listening to each other, stopping and listening to life around us, or stopping and listening even to ourselves. This is a skill that, given our cultural conditioning, must be cultivated. That is one of the things that this book by Parker Palmer, `Let Your Life Speak: Listening for the Voice of Vocation’, strives to do -- to help the reader, the seeker, to be more attentive to life.Palmer is a well-known author in the area of vocational care and consideration. I first encountered Palmer’s writing in another book, The Courage to Teach, as various of us explored the meanings of our vocations as educators in the fields of theology and ministry.Palmer states at the outset in his Grattitudes (a wonderful substitution from the typical words Preface or Introduction) that these chapters have in various guises appeared before. However, they have been re-written to fit together as a complete and unified whole for the purpose of exploring vocation.Chapter 1: Listening to Life, starts as an exploration through poetry and Palmer’s own experience in vocation. What is one called to do? What is the source of vocation? Palmer states: `Vocation does not come from willfulness. It comes
from listening. I must listen to my life and try to understand what it is truly about -- quite apart from what I would like it to be about -- or my life will never represent anything real in the world, no matter how earnest my intentions. 'The very word vocation implies both voice and calling. Crucial to this understanding is that one must be present and attentive to hear that voice, that call.'
