The Invisible Crime: Illegal Microchip Implants And Microwave Technology And Their Use Against Humanity

Synopsis

What happens when a typical, upper-middle-class man from a respectable American family becomes the target of a covert organization bent on controlling both mind and body? When that secret organization is armed with high-tech weaponry which includes microchip technology aimed at controlling the minds and actions of its victims, terror reigns. In this chilling, true-life account, writer Michael Fitzhugh Bell is drugged, abducted, raped, and surgically implanted with microchips. Tracked and tortured, Michael's predators can even read his thoughts. In this battle of man versus technology turned against us, Michael must prove his case to the police before his attackers not only eliminate Michael's memory-but eliminate Michael. From the terror of being electronically stalked to the horror of surgical microchip implants and mind control, Michael Fitzhugh Bell's experiences as a victim will leave you shocked and amazed. His uphill battle with doctors, lawyers, police, Government, F.B.I., C.I.A., and a secret criminal underworld begins in Hollywood, races into and through the North Carolina backwoods, and then back to California. As you experience Michael's journey on each horrific page, you will see actual medical photos, X-rays, ultrasound and MRI images, all showing non-therapeutic tracking and torture devices. These instruments and tools are available to anyone on the Internet, including criminal organizations like those which targeted Michael Bell. His battle for survival continues today. Are you prepared?

I have read other books of stalking/mind control: 'TRANCEformation of America' and '1996'. I found about this book by chance, after listening to an interview: "Coast to Coast AM" on YouTube. This

book brings all the hateful new mind control technology up to date. It's a horrific true story of one persons nightmarish experience of being stalked, harassed, drugged AND THEN had implants to track everywhere he went 24/7! With photos of X-rays as proof. The author was repeatedly attacked with no idea as to why or who was orchestrating this.If anyone doesn't believe this kind of thing can happen - or isn't aware, it's long over due to know what can happen; to anyone.I think it is above and beyond brave to be able to deal with this illegal & evil crime. I can only hope that more ppl will become aware & that others will speak out against this. This HAS to be made illegal in this country (and everywhere).That Mr. Bell had the means to seek help* & made every attempt not to let the 'perps' totally shatter his spirit definitely proves the power of his inner strength AND faith, faith that he would not let this crush his life. When I 'say' faith, I mean; that when the absolute worse thing that anyone can imagine (stalking is not what comes to mind for most ppl), something that threatens one's mental, emotional and physical health - a person HAS to dig deep within to find (what I think) is that spiritual resolve that is within all of us to overcome, it doesn't have to be a religious thing, it doesn't matter what it's called.I sincerely hope that organized stalking will be made illegal & I thank the author for having the courage for writing this book.
