Customer Reviews

Ludlum is better than this. Filled to the brim with expositional dialogue and ridiculous plot twists, "The Bourne Ultimatum" is half a good novel. The good part is pure Ludlum; the ability to weave a good yarn of intrigue and suspense. But the bad is a Jason Bourne who makes one elementary mistake after another; mistakes of judgement that your auntie wouldn’t make if she had even the smallest iota of common sense. Bourne does not. Neither does his wife. Nor does his secret agent friends. Heck, you or I could have killed Carlos the Jackel five times in the course of this book, but Jason Bourne can’t get it done. I finally assumed that Bourne’s primary objective was to inflate Ludlum’s page count, and the FUNDAMENTAL mistakes he made regarding his family had me rooting for the bad guy to off them just to make Bourne pay for his bone-headedness. With an entire world in which to hide, Bourne sends his kids to an island that even the worst private detective could
find in a day, and you know what, that’s exactly what happens. In addition to the “trail of crumbs” method of concealment he employs, just about everyone Bourne knows jumps on a jet and follows him to Paris so even blind people can follow them to the gifted Jason. His own dimwit wife follows him there, and darn it, it just made me want her dead. Sorry. I love the Bourne character, but this foolish person makes you cringe every time he says, "It’s him. The Jackel," and believe you me, he says it about fifty thousand times. Bottom line, a cat has nine lives, but if this version of Jason Bourne were hunting him, he’d have a hundred and nine.

The Bourne Ultimatum pits Jason Bourne against his main nemesis, Carlos the Jackal. The scene that this book sets up feels very exciting as you pick up this book, especially with the thought of Bourne v/s Carlos. Well, the book is very good, not outstanding, but very well written. It’s got plenty of action, and is much more fast paced than the previous two books. Some of the confrontations that Bourne has with Carlos are quite tense and exciting. There’s also a sub-plot regarding the old Medusa that Bourne was a part of but the plots get entangled pretty soon, and its down to a massive game of cat and mouse played between two of the world’s most feared assassins. Ludlum once again manages to keep the book engrossing throughout. His main character is almost 15 years older than what he was in the first part of the series. The ageing factor is handled well and reminds us that Jason Bourne is human after all. Once gets a nice peek into Carlos’s life too, especially about the ways in which he works and how he’s hell bent on killing the only man who has seen his face. Marie St Jaques’s character is wonderful as always, together with Conklin and Mo, they make up the rest of the known cast. David Webb has had children as well, but sadly there’s no interaction between Daddy and his kids. (Thank god Ludlum writes Thrillers!) This is a good book, but the reason I said it wasn’t outstanding, was due to one thing only. That was the climax. It was too weak, especially after three long books, Jason Bourne deserved something much more. Well perhaps, Carlos and Bourne have so many confrontations that Ludlum seemed too tired to make another one for the climax. All in all, this series of three books are all great in their own way and are clearly three of the best books Ludlum has ever written, and quite possibly three of the best thrillers ever. So be it, as JB always says.

If you have read any of the other Bourne books (Identity, Supremacy) you have to read this. Not saying it’s the best out of the series, but it’s neccessary for closure. It’s vintage Ludlum with all of the plot twists and global conspiracies, but as someone said before, the Bourne books introduce a new view on things. You can relate to David Webb and Ludlum does an excellent job building layer
upon layer of psych complexity that makes this character seem so real. One tip: DO NOT READ THE BOURNE SERIES STRAIGHT THROUGH Take a break between books. I went straight from one to the other in a matter of days. I truly feel I would've enjoyed them (especially this one) 10x better if I would have taken a break. So do yourself a favor. They are good books.

This book is seriously flawed. Utterly implausible plot, unconvincing dialogue, seriously stupid characters. The writing was so tedious I had to skip entire pages of drivel just to get through it. The book was so badly written, I threw the book down several times from sheer frustration. I forced myself to finish the book, but never again. Ludlum is on my "Avoid" list.

This is the 4th Robert Ludlum book I've read, and I think it exhibits a marked decline from some of his earlier work. The plot is simply not very believable. Carlos the Jackal is simply unbelievable as a villain - there's no way he could maintain such a far-flung empire of informants, thugs, and hit-men, all willing to die for him, no questions asked, while he stays totally untouchable, masquerading as a priest. The most believable scene in the book is when he shows up in Moscow and his people there laugh at him because he is so ridiculous. Seriously, how many times can Carlos run misdirections where he escapes out the back door or sends a fake van somewhere while his thugs get gunned down? Come on, who would ever work for this guy? He seems like a very different villain now than in the original "Bourne Identity". There, Bourne was able to track him down fairly easily - a random contact here or there dropping a name, whatever. Now, nobody can touch him, and there's a ridiculously long section where Bourne tries to woo Sancho into giving him a fake phone number, and Sancho gets killed. What a waste of paper! And don't even get me started on the Mafia hit men. Ludlum went way too far with the Italian stereotypes there, to the point that they were just goofy. And the whole Medusa conspiracy thing is just very half-baked. Maybe there was something cool there, but Ludlum spends a lot of time building it up for very little payoff. The body count just gets silly too. I guess that's typical with Ludlum. But the plotting in this book is a lot more repetitious, and all the killing doesn't amount to much. Anyway, I much preferred the Bourne Identity and Supremacy. It was like Ludlum was writing this one on autopilot.
